Airlanka having it rough on the ground

Airlanka was experiencing some rough times this weekend - on the ground.

The national carrier had to cancel its Singapore flight on Friday, when the scheduled Tri-Star aircraft was diagnosed with a technical problem.

Following the aircraft being grounded for repairs, passengers on UL-547 enroute to Frankfurt on Sunday were affected.

Airlanka, however, consolidated this one with its Paris flight, UL-563, which was diverted to Frankfurt to accommodate the passengers.

According to a spokesman for the national carrier, the affected aircraft has now been repaired and is back in service.

However, all is not well this week either for Airlanka, on Monday afternoon another Airlanka flight was just taking off - after being delayed for several hours due to a technical problem.

Airlanka currently has seven aircraft in service; six Tri-Stars and one Boeing 737.
